

# Help us test a new computer program!

The **Oregon Center for Applied Science** has created a fun and educational computer program to help adolescents learn about and prevent depression. For this research study we need teens to review the program and tell us what they think about it.

Get up to  
**\$120**

## What will I be doing?

You will view an interactive computer program online. The program will teach you skills and show you how to relate mood, activities, and thoughts.

## How long will it take?

The program takes about 30 minutes a week for 6 weeks. There will be a 30 minute assessment, including a phone interview and an online survey, at 4 different times over 4 months. Participation will take up to a total of 5 hours.

## What do I get out of it?

You may learn skills to help you feel better more of the time. You will be helping others by helping us make a better program for them. You will get up to **\$120** for participating.

Exciting research  
opportunity for  
**11-15**  
year-olds!

This research study is funded  
by the National Institute of  
Mental Health.
